SAXONIA THIN

Elegance in its purest form

With its design reduced to the essence and a slender, artisanally finished manufacture movement, the SAXONIA THIN radiates pure elegance. Now the special editions in 750 honey gold (HONEYGOLD®) and 950 platinum with a jet-black, glossy onyx dial enrich the range of SAXONIA THIN models with two new refined versions, each one limited to 200 pieces.

The new SAXONIA THIN versions in 750 HONEYGOLD® (left) and 950 platinum (right)

The lucid design reduced to the essence describes the characteristic design of the SAXONIA THIN in a nutshell: with its two slender hands and appliques, the dial is totally focused on the indication of time in hours and minutes.

The harmonious face of the watch is the result of precisely adapted proportions. The details reveal the effort that was invested in designing the timepiece: hence, the A. Lange & Söhne designers dedicated a large part of their work to optimising the length and shape of the hands, to the intricate detailing of the baton appliques and their polished chamfers as well as to the sleek, three-part case, giving the SAXONIA THIN its characteristic air of lightness.

Rare radiance in two new colour combinations

The onyx-faced dial that graces the new model versions endows the aesthetic composition with a particularly noble appearance. Rarely used in precision watchmaking, the gemstone mesmerises with its jet-black, glossy surface. In the 750 honey-gold version, the dark hue perfectly matches the warm lustre of the precious metal. Conversely, it provides a fascinating contrast in the version of cool-toned 950 platinum, making the appliques and hands distinctly stand out against the background of the dial.

An eminent sense of style

The distinctive personality of the SAXONIA THIN is based on the design principle “Less is more”. It comes to the fore in the especially slender case in Lange’s exclusive honey gold or 950 platinum, measuring a scant 6.2 millimetres in height, paired with a diameter of 40 millimetres. Thanks to the typical curvature of the sleek lugs, the two-hand watch assures a snug fit on the wrist and can be slipped under a shirt cuff.

A black glossy alligator leather strap complements the elegant appearance of the two special editions of the SAXONIA THIN. Regardless of whether at a business meeting during the day or dinner in the evening – without fail, it expresses a sense of style.

A manufacture movement crafted to the highest standards

As is the case with every Lange timepiece, the SAXONIA THIN is equipped with a dedicated manufacture movement crafted in-house: the manually wound movement, finished to the highest standards of Lange’s watchmaking artistry, can be admired through the sapphire-crystal caseback. The technical particularities of the manufacture calibre L093.1 with a height of merely 2.9 millimetres include a flat mainspring barrel: despite its compact architecture, it boasts a maximum power reserve of 72 hours.

Manufacture calibre L093.1

Elegant design – extending into the movement

The elegant appearance of the SAXONIA THIN is reflected in even the smallest details of the manufacture calibre. “The proportion between crown wheel and ratchet wheel, the prominent shape of the stop-click spring, the arched lines of the three-quarter plate, the size of the flat-polished endpiece, even the position of the blued screws around the gold chatons are meticulously harmonised with a view to mechanics as well as to the aesthetic overall impression,” explains Antony de Haas, Director of Product Development. “With their combination of gold, ruby red and cornflower blue, the three screwed gold chatons additionally provide a striking colourful accent.”

About A. Lange & Söhne

Dresden watchmaker Ferdinand Adolph Lange laid the foundations for Saxony's precision watchmaking industry when he established his manufacture in 1845. His precious pocket watches remain highly coveted among collectors all over the world. The company was expropriated after World War II, and the name A. Lange & Söhne nearly vanished. In 1990, Ferdinand Adolph Lange's great-grandson, Walter Lange, had the courage to relaunch the brand. Today, Lange crafts only a few thousand wristwatches per year, predominantly in gold or platinum. They are equipped exclusively with movements made in-house that are elaborately finished and assembled by hand. With 75 manufacture calibres developed since 1990, A. Lange & Söhne has secured a top-tier position in the world of watchmaking. Its greatest achievements include the LANGE 1, the first regularly produced wristwatch with an outsize date, and the ZEITWERK, with its precisely jumping numerals. Extraordinary complications such as the ZEITWERK MINUTE REPEATER, the DATOGRAPH PERPETUAL TOURBILLON and the TRIPLE SPLIT represent what the manufacture always strives for: to drive the traditional art of watchmaking to ever-new heights. Launched in 2019, the sporty-elegant ODYSSEUS in stainless steel marked the beginning of a new chapter for the manufacture.
