

Press Release

Glashütte, December 2025

LANGE 1 DAYMATIC HONEYGOLD

The self-winding Lange classic in honey gold

The **LANGE 1 DAYMATIC** is the self-winding counterpart of the most renowned A. Lange & Söhne watch – it mirrors the distinctive design of the classic **LANGE 1**. For the first time, it is presented with a case in 750 honey gold (**HONEYGOLD®**). The warm lustre of the gold alloy, exclusive to the manufacture, elegantly complements the brown dial made of 925 silver and endows the 250-piece limited edition with a particularly refined personality.

The new LANGE 1 DAYMATIC HONEYGOLD

In several respects, 7 December represents a memorable day for A. Lange & Söhne. In 1845, Ferdinand Adolph Lange laid the cornerstone for German precision watchmaking in Glashütte on this very day. Yet it is also the day of the courageous fresh start that his great-grandson Walter Lange made – in 1990, the year of German reunification. 35 years later, on the significant date of 7 December 2025, A. Lange & Söhne now launches the new **LANGE 1 DAYMATIC HONEYGOLD**, limited to 250 watches.

Familiar face – mirrored design

Introduced in 2010, the **LANGE 1 DAYMATIC** is unmistakably a **LANGE 1**, yet offers a new perspective on the style-defining design that was awarded multiple prizes. The off-centre dial configuration of the manually wound **LANGE 1** graces the **LANGE 1 DAYMATIC** as well, but the

dial is a mirror image of the original: the hour and minute display is positioned on the right-hand side of the dial, the subsidiary seconds dial and the outsize date on the left.

Contrary to the classic LANGE 1, the LANGE 1 DAYMATIC is not equipped with a power-reserve indicator, but with a retrograde day-of-week display on the left periphery of the dial. This calendar function complements the characteristic outsize date and simultaneously underscores the individuality of the timepiece within the watch family.

Harmonious proportions – rare colour combination

The case of the LANGE 1 DAYMATIC HONEYGOLD exhibits balanced proportions and harmonious lines. With a diameter of 39.5 millimetres and a height of 10.4 millimetres, it assures a snug fit on the wrist and can be slipped under a shirt cuff. Subtly reworked, the lugs and bezel give the watch its particular air of lightness.

Close-up of the new LANGE 1 DAYMATIC HONEYGOLD

The fusion of a honey-gold case with a brown dial in 925 silver account for the unique and elegant appearance of the timepiece. Its radiant lustre is reflected in the hands, appliques and frame of the outsize date. Moreover, the dial offers a variety of expressive details, such as, for instance, the slightly recessed hour and minute circle that intensifies the three-dimensional effect of the dial. The outsize date is depicted in white numerals against a brown background – a perfect match for the dial colour.

The LANGE 1 DAYMATIC HONEYGOLD is worn on a taupe-coloured, hand-stitched alligator leather strap secured with a buckle in solid honey gold.

Traditional design – sophisticated architecture

The balanced design and artisanal finish of the LANGE 1 DAYMATIC HONEYGOLD extend into the interior of the watch where its heart, the lavishly finished self-winding manufacture calibre L021.1, beats reliably. Its individual architecture is inspired by tradition and assures superb precision with a view to adjustment and assembly. This includes, for instance, the four separately screwed plates that visually constitute a classic three-quarter plate in the fully assembled movement.

Reverse side of the new LANGE 1 DAYMATIC HONEYGOLD

Efficient winding and delivery of a constant force are assured by a large central rotor extending across the entire diameter of the movement. Its central segment in 875 gold (21 carats) is embossed with the “A. Lange & Söhne” signature and its centrifugal mass is made of 950 platinum.

The colourful composition of warm-hued gold, cool-toned platinum and cornflower-blue screws makes the rotor an eye-catching focal point of technical elegance. The four slender spokes cushion the heavy rotor in the case of shocks and protect the movement against high strain. When fully wound, a power reserve of 50 hours becomes available.

Typical Lange finissage

Further typical Lange quality hallmarks of the dedicated movement include an indexless oscillation system featuring a large balance wheel with eccentric poising weights, and a balance spring developed and crafted in-house that beats at a frequency of 21,600 semi-oscillations per hour. As is the case with all Lange calibres, the 426-part L021.1 movement is assembled twice and endowed with many traditional elements. The elaborate finissage of all components complies with the manufacture's strictest standards regarding artisanal perfection. Traditional

features such as the hand-engraved balance cock, Glashütte ribbing and screwed gold chatons provide fascinating highlights that can be admired through the sapphire-crystal caseback.

“With its distinctive design, sophisticated manufacture movement and artisanal finissage, the LANGE 1 DAYMATIC HONEYGOLD presents itself as a timepiece with a strong personality for aficionados of self-winding watches,” reflects Anthony de Haas, Director of Product Development. “Its exclusive case material and the rare colour combination make it into an elegant classic with a high recognition value.”

About A. Lange & Söhne

Dresden watchmaker Ferdinand Adolph Lange laid the foundations for Saxony's precision watchmaking industry when he established his manufacture in 1845. His precious pocket watches remain highly coveted among collectors all over the world. The company was expropriated after World War II, and the name A. Lange & Söhne nearly vanished. In 1990, Ferdinand Adolph Lange's great-grandson, Walter Lange, had the courage to relaunch the brand. Today, Lange crafts only a few thousand wristwatches per year, predominantly in gold or platinum. They are equipped exclusively with movements made in-house that are elaborately finished and assembled by hand. With 75 manufacture calibres developed since 1990, A. Lange & Söhne has secured a top-tier position in the world of watchmaking. Its greatest achievements include the LANGE 1, the first regularly produced wristwatch with an outsize date, and the ZEITWERK, with its precisely jumping numerals. Extraordinary complications such as the ZEITWERK MINUTE REPEATER, the DATOGRAPH PERPETUAL TOURBILLON and the TRIPLE SPLIT represent what the manufacture always strives for: to drive the traditional art of watchmaking to ever-new heights. Launched in 2019, the sporty-elegant ODYSSEUS in stainless steel marked the beginning of a new chapter for the manufacture.

LANGE 1 DAYMATIC HONEYGOLD		Ref. 320.050
Movement	Lange manufacture calibre L021.1, self-winding, crafted to the most exacting Lange quality standards, decorated and assembled by hand; precision-adjusted in five positions; central rotor in 875 gold (21 carats) with centrifugal mass in 950 platinum; balance cock engraved by hand	
No. of movement parts	426	
No. of jewels	67	
No. of screwed gold chatons	7	
Escapement	Lever escapement	
Oscillation system	Shock-resistant balance wheel with eccentric poising weights; superior-quality balance spring manufactured in-house, frequency of 21,600 semi-oscillations per hour, precision beat adjustment mechanism with lateral setscrew and whiplash spring	
Power reserve	50 hours when fully wound	
Functions	Time indicated in hours, minutes and subsidiary seconds with stop seconds; Lange outsize date; retrograde day-of-week display	
Operating elements	Crown for winding the watch and setting the time; pusher for correcting the date and corrector for switching the day of week	
Case dimensions	Diameter: 39.5 millimetres; height: 10.4 millimetres	
Movement dimensions	Diameter: 31.6 millimetres; height: 6.1 millimetres	
Crystal and transparent caseback	Sapphire crystal (Mohs hardness 9)	
Case	750 HONEYGOLD®	
Water resistance	Up to 3 bar (30 metres)	
Dial	925 silver, brown	
Hands	750 gold	
Strap	Hand-stitched alligator leather, taupe	
Buckle	Prong buckle in 750 HONEYGOLD®	
Edition	250 watches, edition number engraving
